
Job Description

Employee is responsible for set up and operation of assembly work stations making compressors. The majority of duties are associated with the assembly of compressors which may involve working within any one of the different departments of assembly (compressor assembly, washing, packing, and handling of materials).

Essential Duties and Tasks:

- Safely operate powered industrial equipment.
- Follow standard operating procedures for each work station.
- Compile all daily forms and paperwork as needed which includes completing standard work documentation or reporting SPC process control if required.
- Work within the BITZER continuous improvement system
- Use SAP reporting for material transactions
- Work safely and effectively within a manufacturing environment.
- Perform miscellaneous duties as required. (Not limited to sweeping/mopping/maintaining work areas on a daily basis)

Requirements:

- Must possess effective verbal and written communication skills.
- Must be able to effectively communicate and meet with other team members and supervisors with respect, courtesy, discretion, and sound judgement.
- Must be punctual and have a history of reliable attendance.
- Must possess the ability to work safely and effectively in a team manufacturing environment and be willing to assist other team members, as well as work collectively with others within the organization.
- Must possess good hand/eye coordination.
- Must demonstrate accuracy, responsibility, and thoroughness.

Work Environment:

- This job is performed in a manufacturing environment. Steel toed boots and safety glasses are required.

Physical Demands:

- While performing the duties of this job, the employee constantly is required to stand, walk, bend, stoop, use arms, hands and fingers. May be required to lift, push, and pull 30 or more pounds on a regular basis and occasionally up to 50 pounds.

Job Type: Full-time

Pay: \$15.00 per hour
